TASK MANAGEMENT TOOL

OVERVIEW

Ndatu is a web-based task management software with time tracking, task management and comprehensive reporting features. It helps project managers and teams to complete client requirements & manage time, budget, and scope constraints. The best feature of this tool is the flexibility it provides with regards to the creation of custom workflows- in other words, you can choose to define the rules that need to be followed in the process of tracking and progressing a certain aspect through its life cycle stages.
